HUB FOR INNOVATION AND ENTREPRENEURSHIP

2025-2026 HIVE REPORT

An Innovation and Entrepreneurship Hub of SRIT

ABOUT US

HIVE — Hub for Innovation and Entrepreneurship at SRIT is a dynamic ecosystem built to transform student ideas into impactful, real-world products.

We empower students with everything they need to innovate — cutting-edge facilities, expert mentorship, skill development programs, funding access, and powerful networking opportunities. From the first spark of an idea to a fully viable product, HIVE is with you at every step.

At HIVE, we don't just support innovation — we fuel it. Our mission is to equip the next generation of changemakers with the resources, guidance, and confidence to drive meaningful technological advancements.

Your idea. Our ecosystem. Limitless impact.

MISSION

To empower the students by providing comprehensive resources, essential skills, access to funding, expert mentorship, networking opportunities and cutting-edge facilities, bringing up significant technological advancements.

VISION

To foster a thriving ecosystem that provides essential support and facilities for nurturing innovative ideas from conception to impactful viable products.

Where Industry Problems Meet Real-Time Solutions

HIVE
Hub for Innovation & Entrepreneurship

01

SKILL DEVELOPMENT Classes

Structured problem-solving methodology taught to students to tackle real-world challenges with empathy-driven design

Industry Problem Statements

Multidisciplinary faculty teams receive live problems from industry partners and solve them in real time alongside students

02

03

Skill Development Courses

Curated upskilling programs bridging academia-industry gap, aligned with current market demands

Product Development via HIVE

The need of industry – SRIT delivers:

- AI-based Quality Checking of Radiography Images (ASTM Standards)
- Automated Visual Inspection Systems
- AI Based Assembly Guidance system
- Digital Twin Prototyping & Simulation
- IoT-enabled Production Monitoring Dashboards

VENDING MACHINE

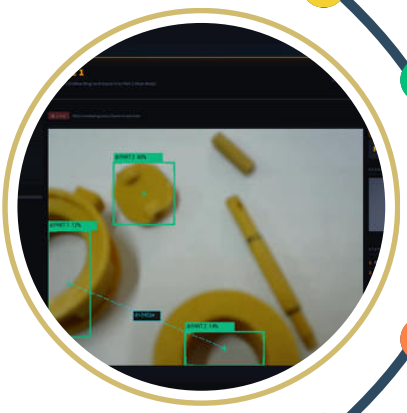

- **TRL LEVEL** → TRL Level 4
- **Innovation** → Smart tea/coffee vending with IoT & payment integration
- **TECHNOLOGY STACK** → Microcontroller, Servo Motors, Sensors, Software
- **OBJECTIVE** → Design, fabricate and test Tea/Coffee Vending Machine
- **Methodology** → Design → Fabrication → Testing workflow

SOLAR STILL

- **TRL LEVEL** → TRL Level 4
- **Innovation** → Sound wave agitation (square wave, 110 Hz) to enhance evaporation in solar desalination; novel acoustic approach replacing costly materials/design changes
- **TECHNOLOGY STACK** → Speaker (K20 Sonic), Signal Generator (SM5060-2), CRO, Amplifier (IC 4440), Taguchi L9 array, ANOVA & Regression analysis
- **OBJECTIVE** → To optimize single-basin solar still performance using sound agitation by finding the optimum sound intensity, wave type, and water depth; applying Taguchi L9 design; analysing via S/N ratio, ANOVA and regression; and comparing the optimised MSS against conventional solar still (CSS)
- **Methodology** → Taguchi L9 orthogonal array → 9 experimental runs → S/N ratio + ANOVA + Regression analysis → Comparison of MSS vs CSS

AR ASSEMBLY

TRL LEVEL

TRL Level 2

INNOVATION

- Instance-Level Metrology: Moves beyond simple "box" detection to polygon-based edge measurement.
- Non-Contact QC: Eliminates manual caliper errors using high-speed AI segmentation.
- Edge-Ready Design: Optimized for low-power industrial controllers.

TECHNOLOGY STACK

- AI: YOLOv8/v11 Segmentation (Ultralytics).
- Language: Python 3.12.
- Tools: CVAT (Annotation), OpenCV (Vision), SciPy (Geometry), Pandas (Logging).
- Hardware: 3D Printed FDM Prototypes & High-Performance Compute (Threadripper) Meta Quest 3.

OBJECTIVE

To automate the identification and dimensional verification (diameter) of five critical valve components, creating a digital-first Quality Control (QC) pipeline for Industry 4.0.

METHODOLOGY

Dataset → Annotation → Training → Calibration → Deployment

METAL VISTA

TRL LEVEL

TRL Level 4

INNOVATION

- Multi-modal AI + thermal imaging for scrap classification
- Explainable AI (LIME, SHAP, Grad-CAM) for transparent decisions
- Industrial-grade accuracy at ¼ the cost of conventional systems

TECHNOLOGY STACK

DenseNet121, VGG-16, YOLO, LIBS/XRF Spectroscopy, Thermal Imaging, LIME, SHAP, Grad-CAM

OBJECTIVE

Build a cost-effective AI classification system (>95% accuracy) with thermal preprocessing and explainable, interpretable outputs.

METHODOLOGY

Metal scraps → Conveyor belt → Thermal enhancement → Camera capture → AI models → XAI explanation → Metal classification & sorting

HIVE
Hub for Innovation & Entrepreneurship

AI QUALITY CHECKER

TRL LEVEL

TRL LEVEL 8
System deployed and actively used in industrial manufacturing for real-time defect detection and quality inspection.

INNOVATION

AI-driven automated quality inspection combining computer vision, OCR, defect detection, and hybrid AI classification with real-time decision-making in production environments.

TECHNOLOGY STACK

Python, PyTorch, YOLO (Object Detection), CNN + Hybrid AI Model, OCR (CRNN), OpenCV, Tkinter UI, SQLite Database, File Monitoring System, GPU Acceleration

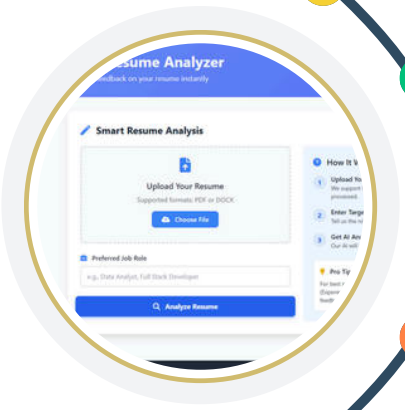

OBJECTIVE

Design and deploy an intelligent AI-based quality inspection system to detect defects, classify product quality (OK/NOT OK), and automate manufacturing inspection processes.

METHODOLOGY

Image Capture → Part Segmentation (YOLO) → OCR Label Detection → Defect Detection → Metadata Extraction → Hybrid AI Classification → Database Logging → Visualization

RESUME ANALYZER

TRL LEVEL

TRL LEVEL 6
Working web-based prototype with real-time resume analysis, deployed and tested with live users.

INNOVATION

Explainable AI-based resume screening with ATS compatibility, role-fit analysis, bias-aware design, and actionable feedback instead of black-box scores.

TECHNOLOGY STACK

Frontend (HTML, CSS, JavaScript)
Backend (Flask APIs)
NLP Transformer-based AI Model, OCR & Resume Parsing (PDF/DOCX), Cloud Deployment.

OBJECTIVE

Design and develop a transparent, fair, and explainable AI system for resume screening to improve hiring efficiency and candidate feedback.

METHODOLOGY

Resume Upload → Text Extraction → AI Analysis (NLP Model) → Explainability Generation → Feedback Output → Human Review

HIVE
Hub for Innovation & Entrepreneurship

BLUEPRINTBOT

TRL LEVEL

TRL Level 4 : Lab prototype validated with real industry drawings.

INNOVATION

Automated Engineering Drawing Interpreter : An AI system that extracts dimensions, GD&T symbols, and projection views from scanned or legacy 2D drawings

TECHNOLOGY STACK

- AI Models: YOLO, EdgeNet, Florence-2.
- Logic: OCR + RAG reasoning engine.
- Platform: Python, Flask, SQLite.

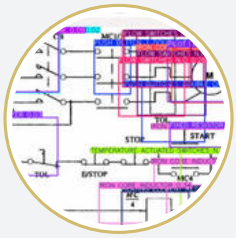

OBJECTIVE

Reduce Manual Effort: To eliminate manual dependency in reading engineering drawings, reducing interpretation time from 20-30 minutes to under 45 seconds.

METHODOLOGY

Data Annotation → Model Fusion → Industry Validation

PANEL2WIRE

TRL LEVEL

TRL Level 5 : Lab prototype validated with real SLD images. End-to-end pipeline tested and producing AutoCAD-native DXF output.

INNOVATION

Automated SLD-to-3LD Converter : The world's first AI system that reads any Single Line Diagram image and automatically generates a production-ready Three Line Diagram – eliminating manual drafting entirely.

TECHNOLOGY STACK

- AI Models: YOLOv11n, OpenCV (Contour + Hough)
- Logic: NetworkX topology graph + Rule-based 3LD engine
- Platform: Python, PyTorch 2.5, CUDA 12.1, ezdxf, AWS

OBJECTIVE

Eliminate Manual Drafting: To remove human dependency in SLD-to-3LD conversion, reducing per-diagram time from 4-8 hours to under 60 seconds with zero transcription errors.

METHODOLOGY

Smart Detection → Topology Graph → 3LD Conversion → DXF Generation

SRI RAMAKRISHNA INSTITUTE OF TECHNOLOGY

HUB FOR INNOVATION & ENTREPRENEURSHIP

INSTITUTION'S INNOVATION COUNCIL (Ministry of Education Initiative)

Congratulations!

ON

SRIT - MSME Host Institute (HI)

In-Principle Approval as Host Institute in 10th PMAC

सूक्ष्म , लघु और मध्यम उद्यम मंत्रालय
MINISTRY OF
MICRO, SMALL & MEDIUM ENTERPRISES

सत्यमेव जयते

Sri Ramakrishna Institute of Technology is Proud to be Recognized as a Host Institution (HI) to act as a Business Incubator (BI) under the Incubation Component of the MSME Innovative Scheme, Ministry of Micro, Small & Medium Enterprises, Government of India.

As a Host Institution, SRIT will now be empowered to:

- Receive and evaluate innovative ideas from students, entrepreneurs & MSMEs
- Forward top ideas for Government of India financial assistance
- Mentor incubatees under the MSME Champions Scheme
- Play a pivotal role in India's innovation & startup ecosystem

Embedded Programming Challenge

Achievement: Second Prize at Shaastra 2026 – IIT Madras
Event Name: Embedded Programming Challenge
Program Type: National Level Technical Competition
Venue: IIT Madras
Year: 2026

Winners:

- Mr. Sanjay V S
- Ms. Akshaya S

About the Achievement:

Sri Ramakrishna Institute of Technology (SRIT) proudly congratulates Mr. Sanjay V S and Ms. Akshaya S for securing the Second Prize in the Embedded Programming Challenge conducted as part of Shaastra 2026, the renowned technical festival of IIT Madras.Their remarkable performance showcased strong expertise in embedded systems, firmware development, and real-time problem-solving. Competing against top teams from across the country, the students demonstrated technical excellence and innovative thinking on a prestigious national platform.

Outcome:

This achievement reflects SRIT's commitment to encouraging student participation in high-impact technical competitions and nurturing future-ready engineers with strong core domain skills.

Brain Bolt – The Engineer's Sprint

Achievement: Participation in Brain Bolt – The Engineer's Sprint
Event Name: ASME IMECE India 2025
Program Type: National Level Technical Competition
Date: 10th September 2025
Venue: HICC, Hyderabad
Organized By: ASME India
Event Category: Brain Bolt – The Engineer's Sprint

Student Participants:

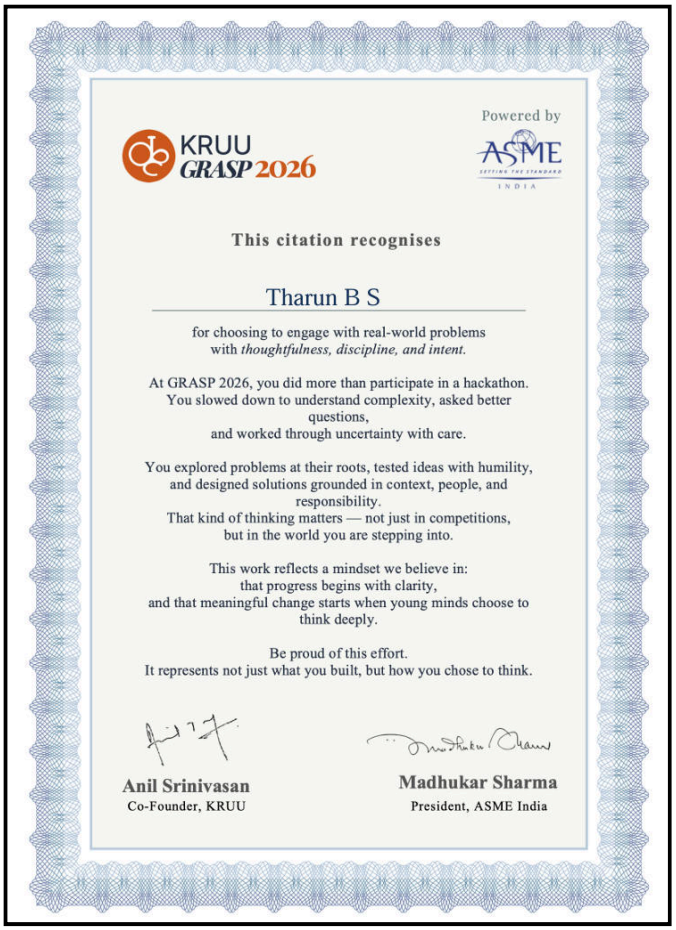

- Jaikumar A
- Nagaraj
- Titus Paul
- Naveen Kumar
- Ranjith Raju

About the Event:

The ASME–SRIT Student Section proudly shares the active participation of its students in Brain Bolt – The Engineer's Sprint, conducted as part of ASME IMECE India 2025, held at the Hyderabad International Convention Centre (HICC), Hyderabad.This prestigious national-level platform brought together engineering students from across the country to showcase their technical expertise, innovation, and problem-solving abilities through competitive challenges.The enthusiastic involvement of SRIT students reflected their commitment to teamwork, creativity, and engineering excellence, representing the institution with pride at a renowned ASME event.

Outcome:

The participation in Brain Bolt strengthened students' real-world engineering experience and motivated them towards higher technical achievements through ASME platforms, contributing to the growth and recognition of the ASME–SRIT Student Section.

KRUU GRASP 2026

Powered by ASME INDIA

This citation recognises

Tharun B S

for choosing to engage with real-world problems
with *thoughtfulness, discipline, and intent.*

At GRASP 2026, you did more than participate in a hackathon.
You slowed down to understand complexity, asked better questions,
and worked through uncertainty with care.

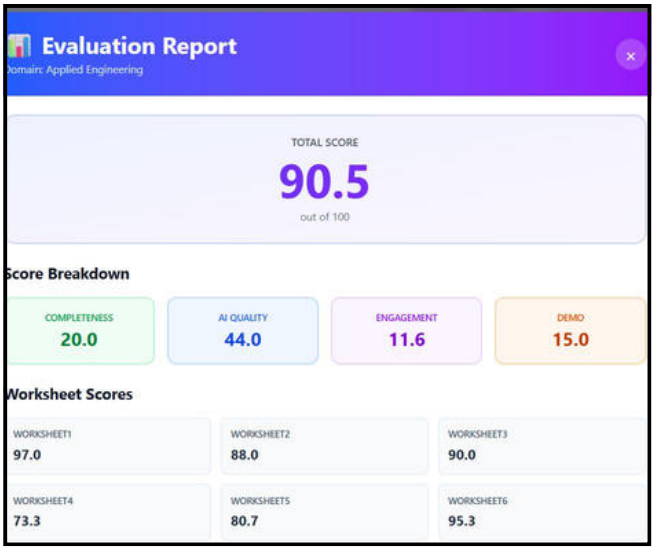

You explored problems at their roots, tested ideas with humility,
and designed solutions grounded in context, people, and responsibility.
That kind of thinking matters — not just in competitions,
but in the world you are stepping into.

This work reflects a mindset we believe in:
that progress begins with clarity,
and that meaningful change starts when young minds choose to think deeply.

Be proud of this effort.
It represents not just what you built, but how you chose to think.

Achievement: Recognition at GRASP 2026 Hackathon
Event Name: GRASP 2026
Program Type: National Level Hackathon / Innovation Challenge
Domain: Applied Engineering
Date: 6th - 8th Feb 2026
Organized By: KRUU (Powered by ASME India)
Event Category: Real-World Problem Solving & Innovation Hackathon

Student Participant:

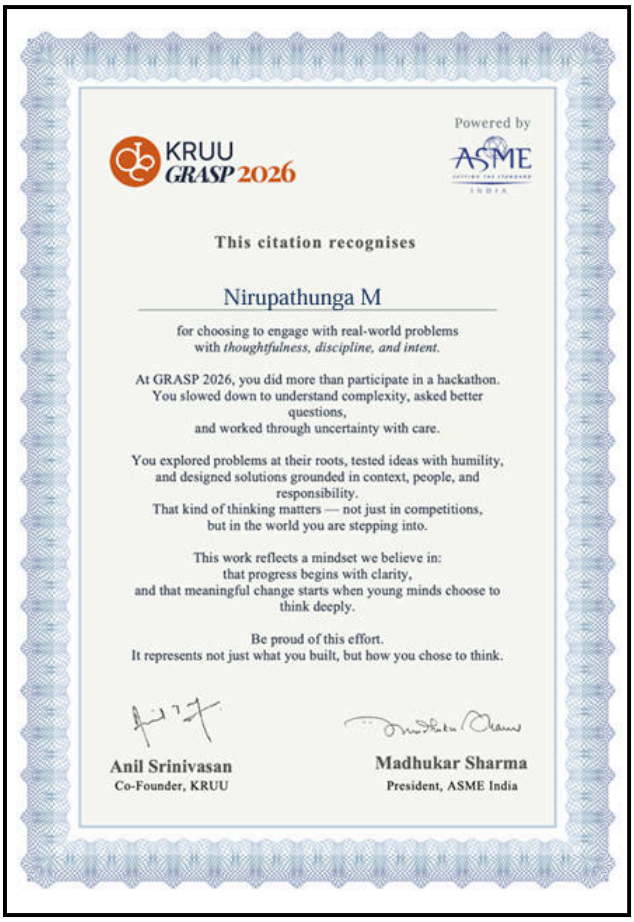

- Tharun B S
- Shri Abinaya S
- Jaisre K

About the Event:

The ASME–SRIT Student Section proudly highlights the recognition received by our Students at GRASP 2026, a national-level hackathon powered by ASME India. The event provided a prestigious platform for young innovators to engage with real-world engineering challenges through structured thinking, creativity, and responsible design.During the hackathon, the participant demonstrated strong analytical and problem-solving abilities by exploring practical problems, asking critical questions, and developing meaningful solutions grounded in context and impact. The experience encouraged thoughtful innovation, discipline, and a deeper understanding of applied engineering practices.

Outcome:

Our Students achieved an excellent overall evaluation score of 90.5/100, reflecting outstanding performance in innovation quality, completeness, engagement, and demo execution. This achievement showcases SRIT students' capability to compete at national platforms and reinforces the ASME–SRIT Student Section's commitment to fostering innovation, technical excellence, and impactful engineering contributions.

About the Event:

The ASME–SRIT Student Section proudly acknowledges the participation of our Students in the GRASP Hackathon 2026, a nationally recognized innovation program powered by ASME India. The hackathon encouraged students to address grassroots and real-world challenges through creativity, collaboration, and structured engineering thinking.During the event, the participant actively engaged in identifying practical problems and developing meaningful solution approaches with a focus on innovation and societal impact. The experience strengthened critical thinking skills and promoted responsible application of engineering knowledge in solving contemporary challenges.

Outcome:

Our Students participation in GRASP 2026 reflects strong commitment towards innovation-driven learning and problem-solving excellence. The event provided valuable exposure to national-level hackathon culture, enhancing the student's confidence, technical mindset, and contribution to the growing achievements of the ASME–SRIT Student Section.

About the Event:

The ASME–SRIT Student Section proudly acknowledges the enthusiastic participation of its students in the SAE Bicycle Design Challenge, held on 27th and 28th September 2025.The competition provided a valuable platform for students to apply engineering principles in the design and development of an innovative bicycle prototype. The event emphasized creativity, practical design thinking, teamwork, and real-time problem-solving.Through their active involvement, the students demonstrated strong technical competence and reflected the spirit of innovation and engineering excellence nurtured at SRIT.

Outcome:

The SAE Bicycle Design Challenge experience strengthened students' design capabilities and motivated them to engage in future engineering competitions, contributing to the growth and recognition of ASME–SRIT Student Section.

About the Event:
Statathon 2025 is a prestigious national-level competition focused on data analytics, problem-solving, and innovation aligned with the vision of Viksit Bharat. The event attracted participation from over 5000+ teams across India, making it a highly competitive platform for aspiring data engineers and analysts.
Team NumerIQ from Sri Ramakrishna Institute of Technology successfully advanced to the Grand Finale, securing a position among the Top 25 teams nationwide. Their performance demonstrated strong analytical thinking, data-driven decision-making, and innovative problem-solving capabilities.

Outcome:
The team became eligible for ₹50,000 seed funding along with a potential internship opportunity, marking a significant milestone. This achievement enhanced students' expertise in data analytics and strengthened SRIT's presence in national-level innovation and technology competitions.

Category: IAM3D Competition
Venue: St. Joseph's College of Engineering and Technology, Palai
Mode of Participation: Offline
Organized By: ASME SJCET Student Section

About the Event:
The ASME SRIT Student Section participated in the IAM3D Competition at ASME EFx SJCET PALAI 2026, a prestigious national-level platform that brought together engineering students from across the country to showcase their technical expertise and innovation.
A team of 14 students represented SRIT and demonstrated strong performance through effective teamwork, technical knowledge, and hands-on problem-solving skills. Their participation in the pit sessions and technical rounds reflected dedication, collaboration, and practical engineering capabilities, providing valuable exposure to real-time competitive environments.

Outcome:
The participation enhanced students' practical knowledge, teamwork, and problem-solving abilities while providing significant exposure to national-level engineering standards. It strengthened their confidence and motivated them to pursue higher levels of technical excellence through ASME platforms.

StudAI Foundry Hackathon

Achievement: Participation in Hackathon Finals
Event Name: StudAI Foundry Hackathon
Program Type: AI Hackathon
Domain: Autonomous Workflow & Operations Systems
Project Title: Foundry Brain – Autonomous AI for Smart Foundry Operations
Date: 30th March 2026
Organized By: StudAI One in collaboration with SRM Institute of Science and Technology
Mode of Participation: Offline

Team Members:

- Tharun B S
- Sanjay V S
- Nandhini T
- Prasanna T

About the Event:
The StudAI Foundry Hackathon served as a competitive platform for developing advanced AI-driven solutions addressing real-world industrial challenges. In this event, the team presented "Foundry Brain," an autonomous AI agent designed to optimize foundry operations through intelligent scheduling and defect analysis.
The system focuses on automating casting order processing, furnace scheduling, and quality assurance using AI-based decision-making. It integrates constraint-based scheduling, retrieval-augmented generation (RAG), and self-correcting mechanisms to ensure efficient and reliable operations in manufacturing environments.
As described in the project (Track 3: Autonomous Workflow & Operations Systems), the solution is capable of processing orders, scheduling furnace slots, detecting defects, and generating audit reports autonomously with minimal human intervention .

Outcome:
The project demonstrated strong capabilities in building autonomous AI systems for industrial applications. The experience enhanced participants' expertise in AI agents, workflow automation, and real-world problem-solving, while providing valuable exposure to advanced technologies such as RAG, constraint optimization, and system integration.

सूक्ष्म , लघु और मध्यम उद्यम मंत्रालय
MINISTRY OF
MICRO, SMALL & MEDIUM ENTERPRISES

TOTAL PROJECT COST APPROVED: ₹15 LAKHS (FULLY FUNDED BY GOVERNMENT OF INDIA)

Theme: Innovation in Adoption of Industry 4.0 & 5.0 in the MSME Ecosystem

Idea: SmartSync 4.0 — AI Powered Digital Twin Platform for MSME Manufacturing

SRIT Faculty advisors: Mr. R. Immanual, AP/MECH | Ms. N. Sanjana, AP/CSE

We are thrilled to announce that Nirupathunga M, a student of Sri Ramakrishna Institute of Technology, Coimbatore, has secured a place in the List of 502 Approved Ideas under MSME IDEA Hackathon 5.0, conducted by the Ministry of Micro, Small and Medium Enterprises, Government of India!

Host Institute:
ANNA UNIVERSITY REGIONAL CAMPUS COIMBATORE

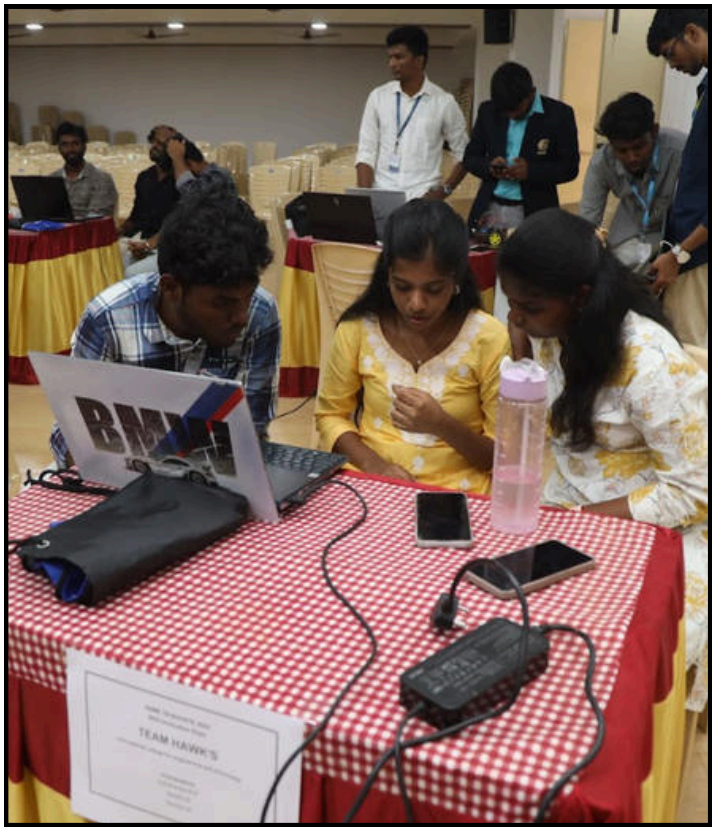

MSME IDEA HACKATHON 5.0

Event Name: MSME Idea Hackathon 5.0
Program Type: Government Innovation Hackathon
Domain: Innovation in Adoption of Industry 4.0 & 5.0 in the MSME Ecosystem
Project Title: SmartSync 4.0 – AI Powered Digital Twin Platform for MSME Manufacturing
Idea Reference No.: IDEATN035074
Organized By: Ministry of Micro, Small and Medium Enterprises (MSME), Government of India
Host Institute: Anna University Regional Campus, Coimbatore
Mode of Participation: Offline
Student:
Nirupathunga M (II Year, CSE)

Faculty Advisors:
Mr. R. Immanual, AP/MECH
Ms. N. Sanjana, AP/CSE

About the Event:
The MSME Idea Hackathon 5.0 is a prestigious national-level initiative conducted by the Ministry of Micro, Small and Medium Enterprises, Government of India, aimed at fostering innovation and entrepreneurship among students in alignment with Industry 4.0 and 5.0 technologies. The hackathon serves as a platform for young innovators to propose scalable, technology-driven solutions addressing real-world challenges in the MSME ecosystem.
In this event, Nirupathunga M presented "SmartSync 4.0," an AI-powered Digital Twin Platform designed to revolutionize manufacturing processes within MSME units. The solution leverages digital twin technology integrated with artificial intelligence to enable real-time monitoring, predictive maintenance, and intelligent process optimization — bridging the gap between traditional manufacturing and smart Industry 4.0/5.0 practices.
Outcome:
Nirupathunga M has been successfully selected among the List of 502 Approved Ideas under MSME Idea Hackathon 5.0, with a Total Project Cost of ₹15 Lakhs, fully funded by the Government of India. This remarkable achievement reflects the student's innovative thinking and technical depth in applying AI and digital twin technologies to the MSME manufacturing sector. The recognition brings pride to Sri Ramakrishna Institute of Technology, Coimbatore, and reinforces the institution's commitment to nurturing industry-ready, research-oriented student innovators.

ASME TN-NOVATE SDG INNOVATION 2025

Program Type: 24 hr Hackathon & Expo
Program Theme: Sustainable Development Goals (SDGs) & Innovation
Date: 13th - 14th November 2025
Duration: Two Days
Time: 10:00AM– 4:00 PM
Venue: Sri Ramakrishna Institute of Technology, Coimbatore
Organized By: ASME Tamil Nadu Section in collaboration with SRIT
Participants:

- Engineering & Polytechnic Students from various institutions
- Faculty Coordinators & Experts from SDG-aligned domains

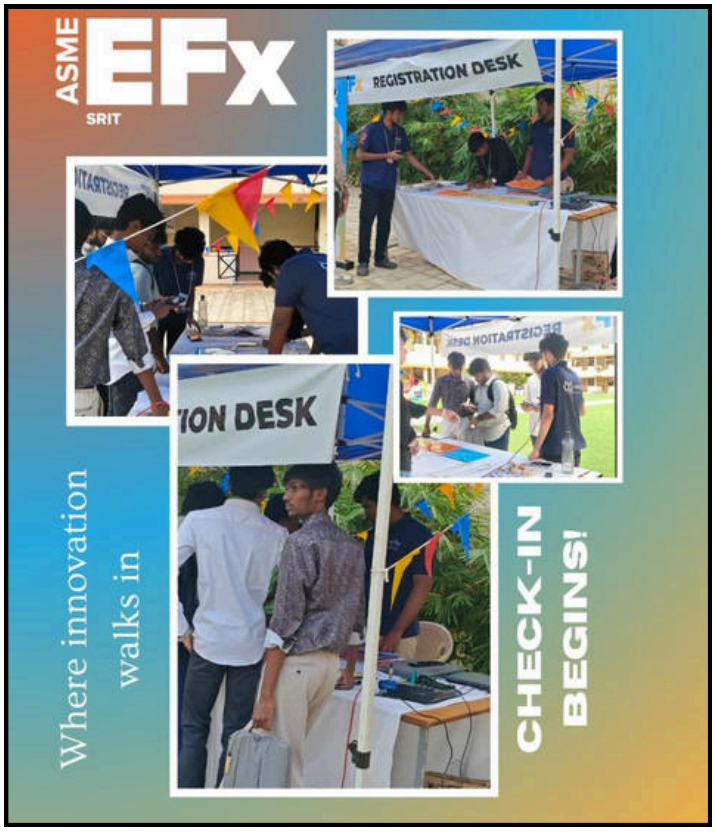

Entry Fee: INR 300
Prize Pool: USD 600

About the Event:

The ASME TN-NOVATE SDG Innovation Expo 2025 was a state-level innovation showcase to encourage sustainable technology development. Held at SRIT, the event provided engineering and polytechnic students a platform to present impactful projects focused on the United Nations Sustainable Development Goals (SDGs). The event was supported by ASME and broadcast live across digital platforms to maximize participation and outreach.

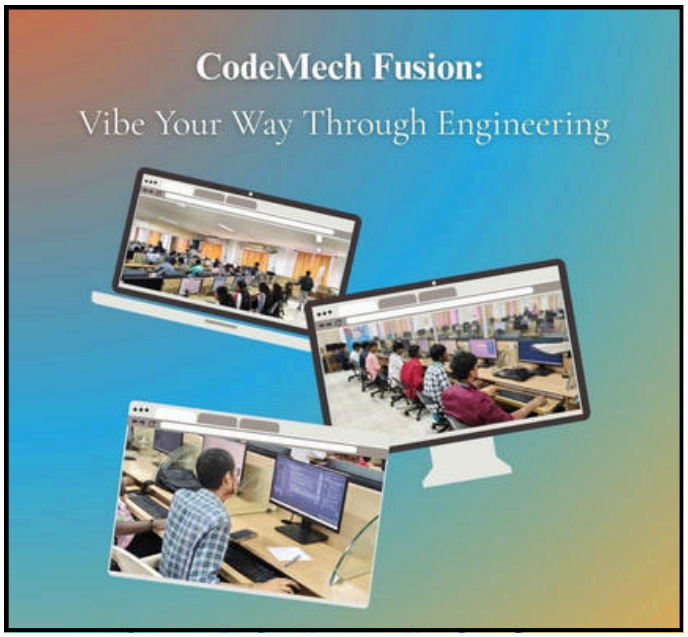

Event Highlights:

- Wide participation from polytechnic and engineering students across Tamil Nadu.
- Projects focused on clean energy, water management, health tech, education, and smart systems.
- A total prize pool of USD 600 was awarded to the top innovations.
- Sessions were streamed live for maximum engagement and transparency.
- The event was hosted with expert panels and juries from academia, industry, and the ASME national body.

ASME EFx SRIT 2026

Program Type: Technical Fest & Engineering Competitions
Program Theme: Innovation, Collaboration & Engineering Excellence
Date: 14th February 2026
Duration: One Day
Time: 09:00 AM – 05:00 PM
Venue: Sri Ramakrishna Institute of Technology, Coimbatore
Organized By: ASME SRIT Student Section

Participants:

- Engineering students from various departments
- ASME student members and innovators

Entry Fee: As per event category

Prize Pool:

- Oral Competition – 1100 USD
- CodeMech Fusion – ₹10,000
- 3D CAD Competition – ₹10,000

About the Event:
ASME EFx SRIT 2026 was a flagship engineering festival that brought together students, innovators, and technical enthusiasts to experience a day of innovation-driven learning and competition. Hosted at Sri Ramakrishna Institute of Technology, the event provided a dynamic platform for participants to explore engineering concepts beyond classrooms through hands-on activities and real-time problem-solving.
The fest featured a diverse lineup of events including the ASME Old Guard Oral Competition, CodeMech Fusion, 3D CAD Designing Competition, and a specialized workshop on the Design of Centrifugal Pumps. These events encouraged participants to apply theoretical knowledge into practical solutions, enhancing both technical and analytical skills.
The interactive sessions, competitions, and workshops created an engaging environment that promoted teamwork, creativity, and engineering excellence, aligning with ASME's mission of empowering future engineers.

Event Highlights:

- Diverse technical events covering design, coding, and presentation skills
- Workshop on centrifugal pump design with real-world applications
- Active participation from students across multiple disciplines
- Hands-on learning and real-time problem-solving exposure
- Platform for innovation, collaboration, and professional growth

HIVE

ESTABLISHED IN 2002

ENGINEERS DAY PRESENTATION

Program Type: Presentation
Program Theme: Engineers' Day Celebration
Date: 15th September 2025 (Monday)
Duration: 2 Hours
Venue: HIVE, SRIT
Mode of Delivery: Offline
Organized By: Hub of Innovation and Entrepreneurship
Resource Person : Dr. E. Balagurusamy, renowned Indian educator, author, and former Vice-Chancellor of Anna University, Chennai (2004).
Participants:

- Faculty: 2
- Internal Students: 60
- External Students: Not Applicable

About the Event:

Engineers' Day was celebrated with great enthusiasm by the Department of Mechanical Engineering, SRIT, to honor the contributions of engineers in nation-building and technological development.
As part of the celebration, a student presentation session was conducted, where students showcased innovative ideas, emerging technologies, and engineering solutions to real-world problems.
The event aimed to encourage creativity, technical communication, and awareness of the role of engineers in society. Students actively participated and demonstrated their knowledge through well-prepared presentations.

Event Highlights:

- The program was conducted to celebrate Engineers' Day and motivate students.
- Students presented ideas on modern technologies, sustainability, AI, and innovation.
- The session helped improve their technical knowledge, communication, and confidence.
- Faculty members provided guidance and valuable feedback.
- The event encouraged teamwork, creativity, and professional ethics.
- Overall, it was an engaging and inspiring celebration.

ENGINEERS DAY PRESENTATION

Program Type: Presentation
Program Theme: Engineers' Day Celebration
Date: 15th September 2025 (Monday)
Duration: 2 Hours
Venue: HIVE, SRIT
Mode of Delivery: Offline
Organized By: Hub of Innovation and Entrepreneurship
Participants:

- Faculty: 2
- Internal Students: 60
- External Students: Not Applicable

About the Event:

The afternoon session of Engineers' Day was dedicated to showcasing student-led technical presentations under the theme Hub of Innovation and Entrepreneurship.
This segment provided a platform for students to share insights on engineering innovations, entrepreneurial ideas, and cutting-edge technologies. The focus of the session was to stimulate creative thinking, enhance problem-solving skills, and promote an entrepreneurial mindset among engineering students.
Under the supervision of faculty mentors, students prepared and delivered presentations that reflected their technical knowledge and interest in emerging domains of engineering.

Event Highlights:

- Student teams presented innovative ideas focused on practical solutions and start-up concepts.
- Topics included renewable energy, automation, smart systems, and prototyping.
- The session promoted peer learning and improved students' presentation skills.
- Faculty mentors provided valuable feedback for improvement.
- Overall, it encouraged innovation and entrepreneurial thinking among students.

Project Presentation

Program Type: Project Presentation & Expert Interaction
Program Theme: Innovation Showcase & Mentorship Interaction
Date: 14.11.2025
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: ASME SRIT Student Section & Hub of Innovation and Entrepreneurship (HIVE)
Chief Guest: Dr. Abhay Jere, Honorable Vice Chairman, AICTE

About the Event

Sri Ramakrishna Institute of Technology provided an inspiring opportunity for student innovators to present their AI-based project Metal Vista (Visual Intelligence System for Transparent Analysis) to the Honorable Vice Chairman of AICTE, Dr. Abhay Jere.This interaction served as a prestigious platform to showcase student research and innovation at a national leadership level. The presentation highlighted the team's efforts in applying artificial intelligence for advanced transparent analysis and intelligent metal classification systems.The session offered valuable feedback, insights, and encouragement from the esteemed expert, motivating the students to further refine and scale their idea for broader impact.

Outcome

The event significantly enhanced students' exposure to high-level academic and innovation leadership. The feedback and motivation received encouraged the team to strengthen their vision, expand project implementation, and pursue further advancements in AI-based intelligent systems. This interaction reinforced SRIT's commitment to nurturing innovation, entrepreneurship, and impactful student research through HIVE.

Chief Guests:

- Mrs. Gowri Kailasam, CEO (SLD/LMCI), Rane Madras Ltd.
- Dr. M. Shyamala, Assistant Director (Planning), TNDTE

About the Event

Sri Ramakrishna Institute of Technology provided an excellent platform for student innovators to present their project work before distinguished chief guests from industry and academia. The session featured an interactive project presentation where students showcased their innovative solution and explained its real-world applications, technical design, and future scope.The presence of Mrs. Gowri Kailasam, CEO of Rane Madras Ltd., and Dr. M. Shyamala, Assistant Director (Planning), TNDTE, made the event highly valuable and inspiring. Their expert observations and mentorship encouraged students to think beyond prototypes and work towards scalable, impactful innovations.The interaction served as a prestigious opportunity for students to gain exposure to industry expectations, entrepreneurship pathways, and professional feedback.

Outcome

The session boosted students' confidence and presentation skills. Feedback and encouragement from the chief guests inspired the team to refine their project further and explore industry-level implementation, supporting SRIT's vision of innovation and entrepreneurship through HIVE and ASME.

INNOVATIONS IN AUTOMATION AND MACHINE VISION SYSTEMS

Program Type: Seminar
Program Theme: Automation & Machine Vision Systems
Title: Innovations in Automation and Machine Vision Systems: From Concept to Industry Implementation
Date: 10th January 2026 (Saturday)
Duration: 2 Hours (02:30 PM – 04:30 PM)
Venue: Centre of Excellence – Intelligent Systems (COE IS), SRIT
Mode of Delivery: Offline
Organized By: ASME SRIT Student Section, COE IS & Department of Mechanical Engineering
Resource Person: Mr. S. Balaji Raghavendra, Founder & CEO, Piroya Technologies Pvt. Ltd., Bangalore

About the Event:

Sri Ramakrishna Institute of Technology successfully organized a seminar on “Innovations in Automation and Machine Vision Systems: From Concept to Industry Implementation” on 10th January 2026. The session was conducted to provide students with valuable exposure to modern industrial automation practices and the growing role of machine vision in intelligent manufacturing.The seminar highlighted how automation and vision-based systems are transforming industries through smart inspection, robotic integration, and data-driven decision-making. Students gained insights into bridging academic concepts with real-time industrial applications.

INNOVATING WITH GRAPHRAG

Program Type: Workshop
Program Theme: Structured & Trustworthy AI Systems
Title: Innovating with GraphRAG: Engineering Structured, Trustworthy LLM Systems
Date: 29th December 2025 (Monday)
Duration: 1 Day
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: ASME SRIT Student section & HIVE
Expert Speaker: Mr. Mohan Krishna G R, Computer Science Researcher & Applied AI Engineer
Coordinators:

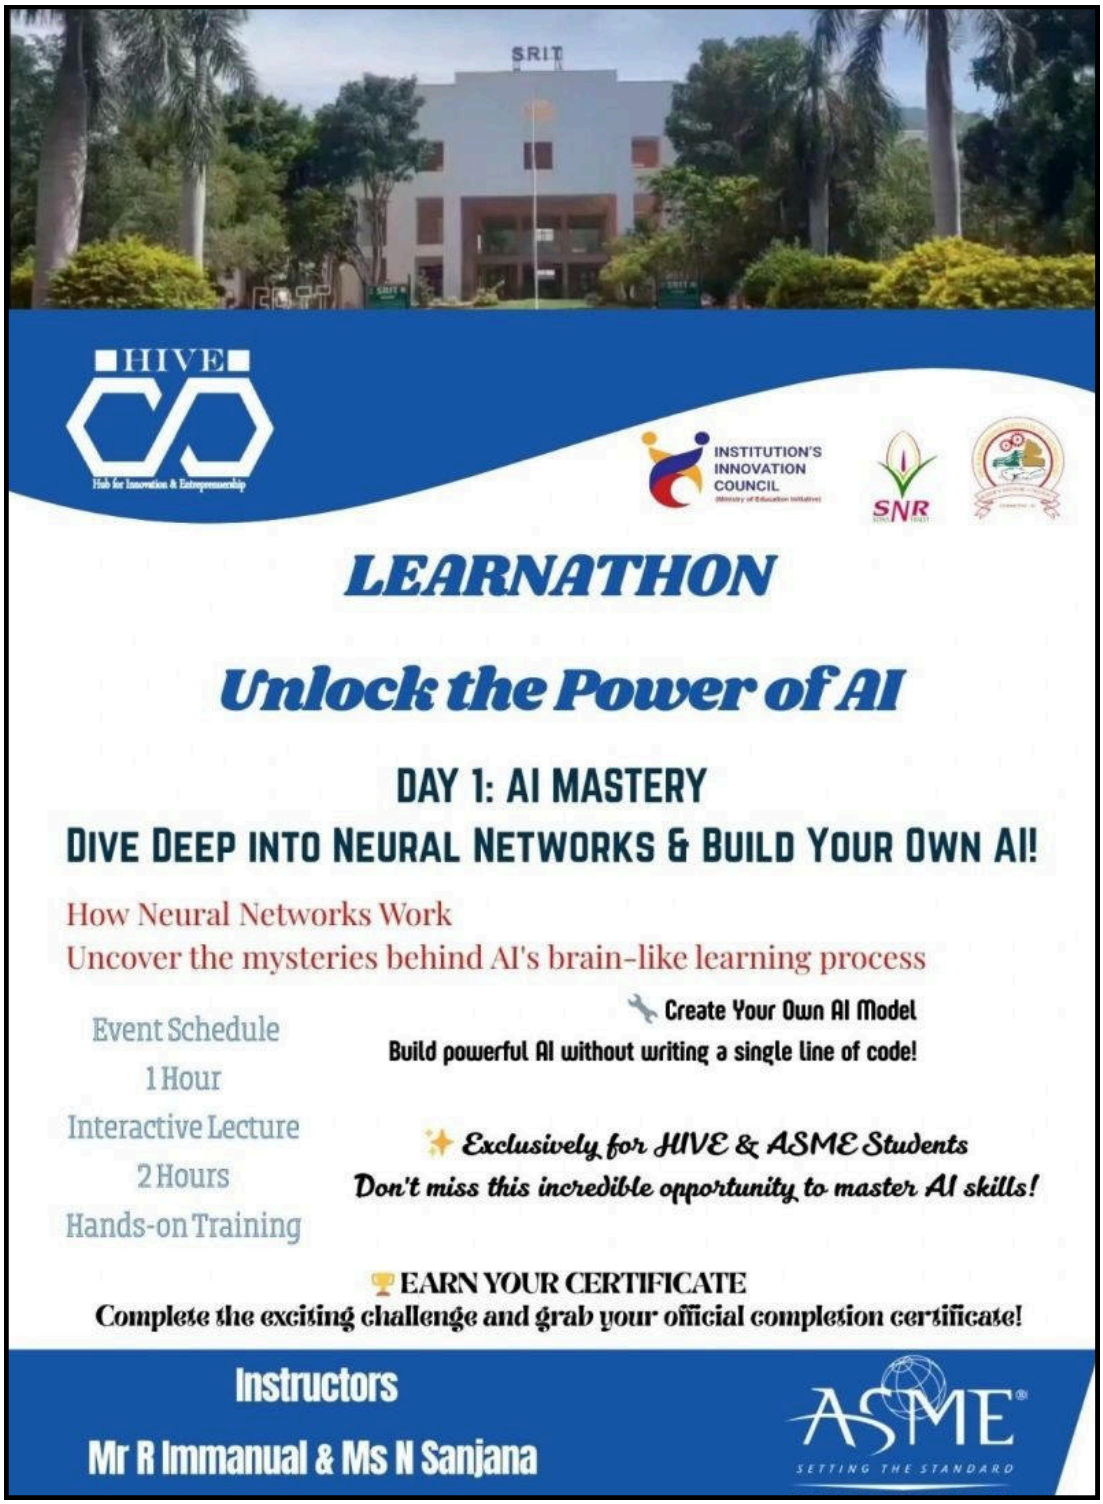

- Ms. N. Sanjana, AP/CSE
- Mr. R. Immanual, AP/Mechanical

About the Event:

Sri Ramakrishna Institute of Technology successfully hosted its first-ever workshop on GraphRAG, titled “Innovating with GraphRAG: Engineering Structured, Trustworthy LLM Systems.”.This inaugural session marked a significant milestone in SRIT’s AI education journey, introducing students to the emerging domain of Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) systems.
The workshop aimed to provide foundational understanding of GraphRAG architecture, structured reasoning, and the design of reliable AI systems for research and industry applications.

Event Highlights:

- Expert lecture on GraphRAG architecture and multi-hop reasoning
- Strong cross-department participation from Mechanical and CSE students
- Live mentorship support for three active student research teams
- Focus on building structured and trustworthy LLM-based systems
- Encouraged innovation, curiosity, and research-driven learning

Session: Day 1 – AI Mastery
Mode of Delivery: Offline
Organized By: HIVE & ASME–SRIT Student Section
Supported By: Institution's Innovation Council (IIC)
Instructors: Mr. R. Immanual & Ms. N. Sanjana

About the Event:

The ASME–SRIT Student Section in collaboration with HIVE successfully conducted Day 1 of LEARNATHON – Unlock the Power of AI, an interactive initiative aimed at introducing students to the fundamentals of artificial intelligence.
The session offered participants a deep dive into the core concepts of neural networks and AI modeling, providing an engaging learning experience without requiring prior coding knowledge. The workshop was designed to make AI accessible and encourage students to explore emerging technologies shaping the future of engineering.

Focus Areas Covered:

- Understanding how neural networks work
- Exploring AI's brain-like learning process
- Hands-on guidance for creating basic AI models
- Interactive lecture and practical training sessions

Outcome:

The session successfully enhanced students' awareness of AI technologies and motivated them to pursue further learning in machine learning and intelligent system development through ASME and HIVE platforms.

HOW TO MANAGE EVENTS LIKE A PRO

Program Type: Professional Development Session
Program Theme: Event Management & Leadership Skills
Title: Behind the Scenes: How to Manage Events Like a Pro
Date: 30th August 2025 (Saturday)
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: ASME–SRIT Student Section

About the Event:

The ASME–SRIT Student Section successfully conducted a professional development session titled “Behind the Scenes: How to Manage Events Like a Pro” on 30th August 2025.The session was designed to equip students with essential knowledge and practical skills required for effective event planning, coordination, and execution. It focused on building leadership qualities and enhancing the ability of students to organize impactful technical and professional events with confidence.
Participants gained valuable insights into teamwork, time management, communication, and the structured approach needed for successful event management.

Outcome:

The session successfully strengthened students’ organizational and leadership capabilities, preparing them to take up key roles in managing ASME events and contributing effectively to professional development activities.

About the Event:

The Hub for Innovation and Entrepreneurship (HIVE), SRIT, successfully organized a workshop titled “Effective Sales and Marketing Strategies for Entrepreneurs/Startups” on 22nd February 2025 as part of the Institution’s Innovation Council (IIC) calendar activities.
The workshop aimed to provide students and aspiring entrepreneurs with essential knowledge on building strong marketing approaches and sales strategies for startup growth. The session focused on practical insights into customer engagement, branding, market positioning, and business development techniques.Participants gained valuable exposure to the fundamentals required for promoting entrepreneurial ventures and sustaining them in competitive markets.

Outcome:

The workshop successfully enhanced participants’ understanding of business-oriented strategies and motivated them to explore entrepreneurship and startup development with confidence.

OUTREACH ACTIVITY

Program Type: Community Outreach Activity
Program Theme: Compassion and Social Responsibility
Title: Visit to Senior Citizens Home
Date: 2nd August
Venue: Senior Citizens Home, Mathipalayam, Thenkarai, Coimbatore
Organized By: ASME–SRIT Student Section
Participants: Nearly 25 Student Members
Mode of Delivery: Offline

About the Program:

The ASME–SRIT Student Section organized a meaningful community outreach visit to the Senior Citizens Home at Mathipalayam, Thenkarai, Coimbatore, as a step towards spreading compassion and social responsibility.Nearly 25 student members participated in the visit and spent valuable time interacting with the elderly residents. The session was filled with warmth, smiles, and heartfelt conversations, creating memorable moments of joy and connection across generations.The initiative reflected ASME's commitment not only to technical excellence but also to nurturing empathy, kindness, and community engagement among future engineers.

Outcome:

The Senior Citizens Home visit successfully reinforced the importance of kindness and community service among students, inspiring them to continue contributing positively to society through outreach and engagement activities.

Faculty Inventor: Mr. R. Immanual
Co-Inventors: Dr. R. Kumar, Dr. S. Nagarani, Dr. M. Kalpana Devi, Dr. S. Kalyani, Ms. N. Sanjana, Ajay Vardhanan J.V

12. Drone Chassis with Robotic Arm
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Ms. N. Sanjana, Kirthika K.M., R. Sowmitha, P. Sowndarya, T. Sathiyaruba, Ajay Vardhanan J.V

13. Washroom Cleaning Robot
Faculty Inventor: Dr. Sangeetha Shanmugam
Co-Inventors: D. Poornima, Kirthika K.M., Ms. N. Sanjana, Dhanush Karthik J.

14. Mobile Robot Chassis with Robotic Arm
Faculty Inventor: Ms. N. Sanjana
Co-Inventor (Faculty): Mr. R. Immanual
Co-Inventors: Kirthika K.M., Abdul Fayiqa A., Anushan R., Anandh E., Ajay Vardhanan J.V

15. SmartShield: Camera-Integrated Mudguard for Real-Time Tire Pressure Monitoring in Electric Vehicles
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Dr. B. Gunapriya, Dr. Sangeetha Shanmugam, Poornima, Dhandapani, Ms. N. Sanjana, Ajay Vardhanan J.V

16. Water Tap with Lamp Holder
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Varun B., Kirthika K.M., R. Arul, Ms. N. Sanjana

17. Bi-Fluid Evacuated Tube Collector
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Dr. M. Veeramanikandan, M. Yogesh, V. Mohanathan, P. Bharathi, Dr. D. Sathish, Dr. R. Thirunavukkarasu

18. Go-Kart Chassis
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Kirthika K.M., Ms. N. Sanjana, Sanjay K.R., Sathya J., Dhanush Karthik J., Sriram M., Hariharan M., Vishal M., Raj Ganesh K., Ragulsugatheswaran P.

19. Spiral Flow Bi-Fluid Photovoltaic Thermal Collector
Faculty Inventor: Mr. R. Immanual
Co-Inventors: Dr. M. Veeramanikandan, L. Karthikeyan, K.V. Srihari, N. Yogesh, Dr. D. Sathish

20.Electroencephalographic Brain–Computer Interface System for Immersive Virtual Reality Navigation with Six Degrees of Freedom Control for Accessibility-Enhanced Educational Tours
Inventors: Mr. R. Immanual, Ms. N. Sanjana N., Alan Sahayaraj, Aswin Bharath S.V., Hussain Mustafa Ali, Janani E., Jaisre K., Sharun K.

21. Spiral Flow Bi-Fluid Photovoltaic Thermal Collector

Faculty Inventor: Mr. R. Immanual, Assistant Professor, Department of Mechanical Engineering

Co-Inventors: Dr. M. Veeramanikandan, L. Karthikeyan, K. V. Srihari, N. Yogesh, Dr. D. Sathish, Dr. R. Thirunavukkarasu

22. Floating Solar Still

Faculty Inventor: Mr. R. Immanual, Assistant Professor, Department of Mechanical Engineering

Co-Inventors: K. M. Kirthika, Ms. N. Sanjana, S. Hema Varshini, K. Bhuvaneshwari, S. Suman Nath, P. I. Bharath, B. Nallasivan, A. Siddharth

23. Augmented Reality Based Intelligent Assembly Guidance and Torque Monitoring System for Industrial Valve Manufacturing

Faculty Inventor: Mr. R. Immanual, Assistant Professor, Department of Mechanical Engineering

Co-Inventors: N. Sanjana, D. Poornima, Sangeetha Shanmugam, M. Nirupathunga, J. Krishnakanth, P. Kamaleshwaran, H. Titus Paul, N. S. Deepana

24. AI-Based Automatic Visual Inspection System for Small Scale MSME Manufacturing

Faculty Inventor: Mr. R. Immanual, Assistant Professor, Department of Mechanical Engineering

Co-Inventors: N. Sanjana, Sheela Sobana Rani, S. Alan, B. Naveenkumar, S. Senbagapriya, P. Kamaleshwaran, S. Kalaiselvan, T. Prasanna

25. Extended Reality Teleoperation System with 360-Degree Video Streaming and Real-Time Digital Twin Monitoring for Remote Environment Exploration

Faculty Inventor: Mr. R. Immanual

Co-Inventors: N. Sanjana, V. S. Sanjay, T. Nandhini, B. S. Tharun, S. Shri Abinaya, P. Kamaleshwaran, K. Jaisre, A. Jaikumar

KAPILA Scheme

Kalam Program for IP Literacy and Awareness (KAPILA)

Sri Ramakrishna Institute of Technology actively participates in the KAPILA Scheme, a Government of India initiative aimed at promoting Intellectual Property (IP) literacy and patent filing among academic institutions.

Committee & Governance

A dedicated KAPILA Committee was constituted as per scheme guidelines and conducted its meeting in hybrid mode on 12th August 2025, under the Chairmanship of Dr. J. David Rathnaraj, Principal. The committee comprised five members including an Institute Alumni (from Protiviti India), an Incubation Head (SREC SPARK Incubation Foundation), an IPR Expert (Patent Agent, PSG College of Technology), and a Faculty Convenor.

Patent & Design Applications Filed

Following the committee's deliberation, a total of 16 Patent Applications and 20 Design Applications were identified, reviewed, and finalised for submission — representing innovations from six departments of the institute, contributed by both faculty and student innovators.

Category Number of ApplicationsPatent Applications Filed16Design Applications Filed20Total36

Departmental Participation

Applications were received from the following departments:

Information Technology
Computer Science and Engineering
Science and Humanities
Mechanical Engineering
Electronics and Communication Engineering
Electrical and Electronics Engineering

Highlights of Patent Ideas

Some notable innovations submitted for patent include: Portable Electric Massager, Smart Grocery Container, Smart Bucket Queue System, Real-Time Adaptive Traffic Flow Management using Stochastic Mathematical Models, Quantum Crypto-Graphy for Secure Cloud Computing, Acoustic Battery Cooling System with AI-Controlled Frequency Optimization, Deep Learning-Based Image Captioning, Smart Bongo Therapy System for Autism Sensory-Motor Rehabilitation, Image Semantic Segmentation using AI, and a Sun Light Tracking Solar Panel System, among others.

Expenditure Statement

The total reimbursable expenditure claimed under the KAPILA Scheme is as follows:

CategoryTotal AmountPatent Applications (Filing + Examination + Early Publication Fees)₹86,060Design Applications (Registration Fee)₹20,000Grand Total₹1,06,060

Program Type: Internship Program
Theme: Multi-Domain Technical Internship
Duration: Winter 2024–25
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: HIVE – Hub for Innovation and Entrepreneurship, SRIT

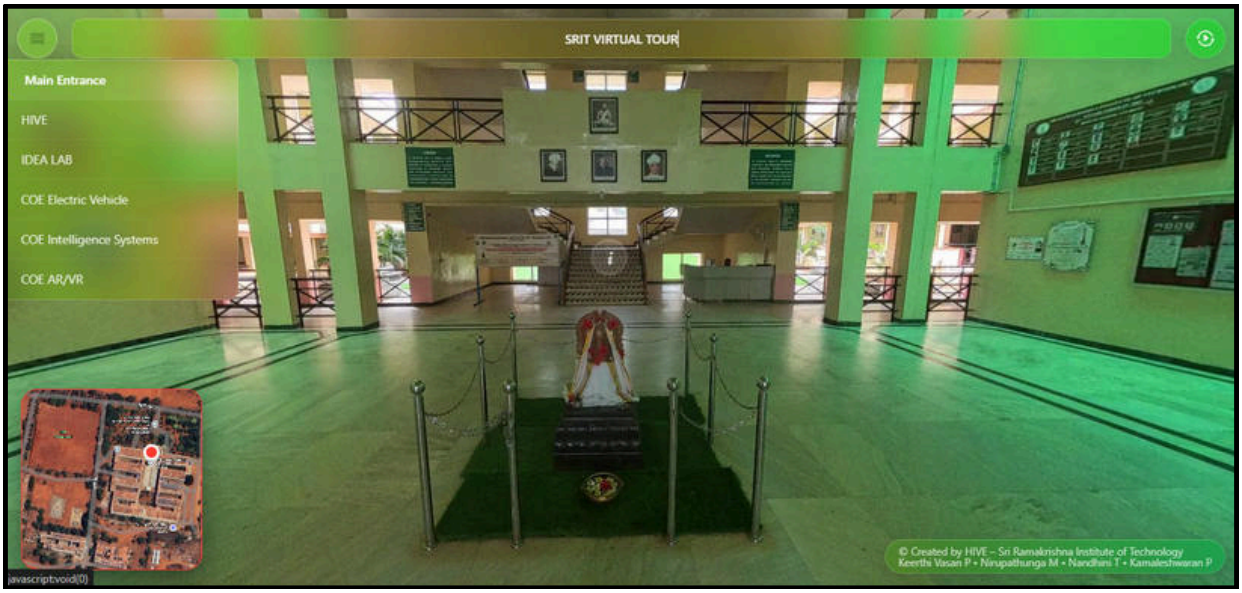

About the Program:

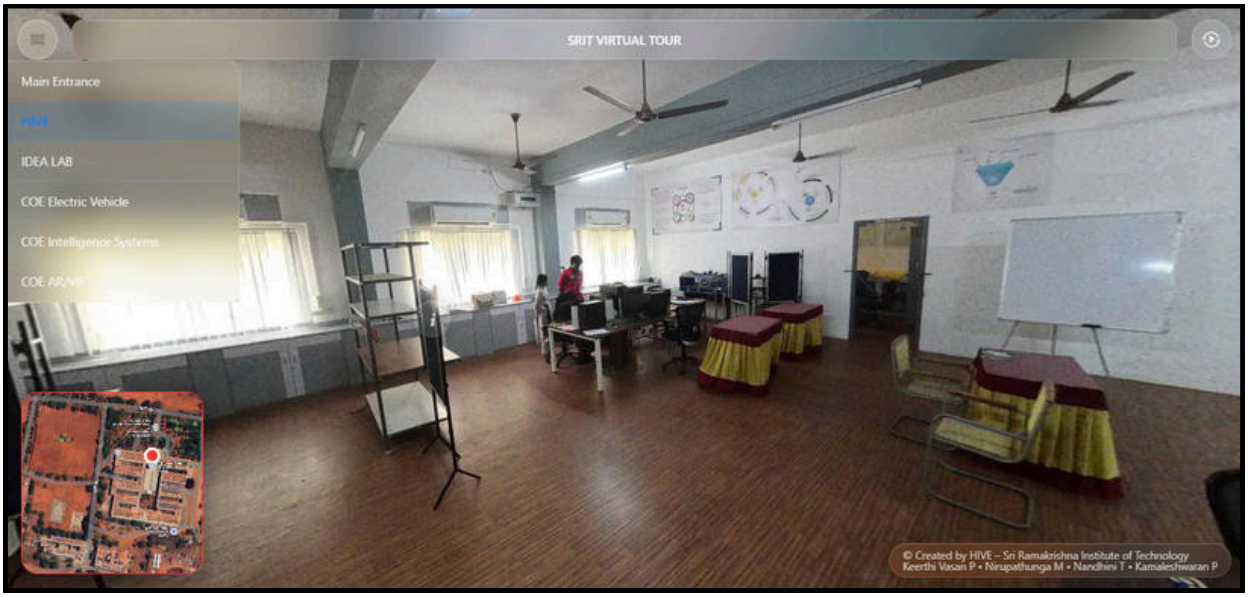

Sri Ramakrishna Institute of Technology, through its innovation hub HIVE, successfully conducted a Winter Internship Program offering students an intensive, hands-on experience across multiple cutting-edge technical and research domains. The internship was designed to bridge the gap between academic learning and real-world application, enabling students to work on live projects under the mentorship of experienced faculty and industry professionals.
The program spanned several specialized domains, allowing students to contribute meaningfully to ongoing research, digital development, and technology initiatives at the institute.

Outcome:

The Winter Internship Program under HIVE provided students with a transformative learning experience that extended well beyond the classroom. Participants developed technical proficiency in their respective domains, improved their problem-solving abilities, and gained confidence in executing real-world projects. The program fostered a culture of innovation, collaboration, and entrepreneurial thinking, aligning with HIVE's mission to nurture the next generation of technologists and innovators at SRIT.

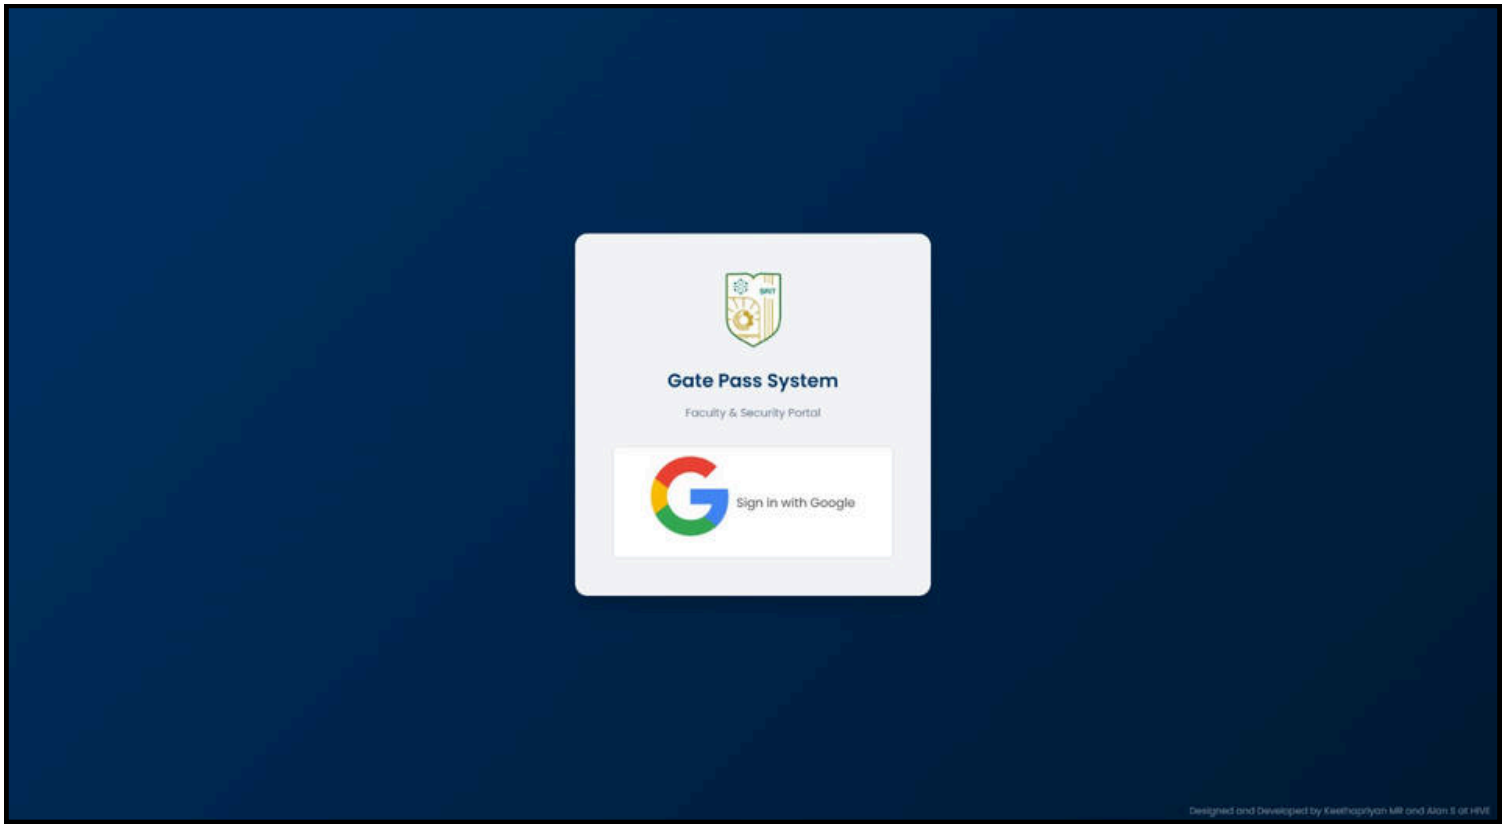

HIVE
Hub for Innovation & Entrepreneurship

Program Type: Winter Internship Project
Domain: Virtual Tour Development & Deployment
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: HIVE – Hub for Innovation and Entrepreneurship, SRIT
Deployed URL: https://www.srit.org/srittour/

About the Program:

As part of the HIVE Winter Internship Program, a team of five students — Keerthivasan P, Kamaleshwaran P, Nandhini T, Nirupathunga M, and Krishnakanth J — successfully conceptualized, developed, and deployed an immersive 360° Virtual Tour of the SRIT Campus, now live at www.srit.org/srittour/. The project provided an end-to-end development experience encompassing site planning, interactive navigation, hotspot annotations, and web deployment — making the campus digitally accessible to prospective students, parents, alumni, and visitors from anywhere in the world. The successful live deployment of this tour on the institute's official domain stands as a tangible, high-impact outcome of the internship, reflecting the students' technical growth and HIVE's commitment to transforming student talent into real-world solutions.

Designed and Developed by Keerthapriyan MR and Alan S at HIVE

Program Type: Winter Internship Project
Domain: Virtual Tour Development & Deployment
Venue: Sri Ramakrishna Institute of Technology (SRIT)
Mode of Delivery: Offline
Organized By: HIVE – Hub for Innovation and Entrepreneurship, SRIT
Deployed URL: https://sritgatepassapp.vercel.app/

About the Program:

As part of the HIVE Winter Internship Program, a team of two students — Alan S and Keethapriyan M — successfully designed and deployed a smart Gate Pass System for the SRIT Campus. The system enables secure and paperless management of entry and exit records for students, staff, and visitors, improving campus security and administrative efficiency.
This project provided hands-on experience in system design, database management, user authentication, and web deployment, resulting in a practical real-world solution that reflects the students' technical growth and commitment to developing impactful digital systems.

Experience the Security of SRIT

The objective of SISH is to provide exposure in cutting edge technologies for innovations, startups and entrepreneurs to grow their business. This hub will act as a guiding framework to translate the ideas into reality by enabling the students and staff to actively engage in innovation and entrepreneurship-related activities.

Our Goals

1. To promote new technology/ knowledge/ innovation-based startups.
2. To inculcate a culture of innovation-driven entrepreneurship in the campus.
3. To conduct training programs, seminars and mentorship guidance to entrepreneurs.
4. To build a vibrant startup ecosystem, by establishing a network between academia, financial institutions, industries, and other institutes.

Incubated Startups

5. **Mechatron Motors LLP (2021)** - Electric vehicle e manufacturing and hybrid bike conversions Founders: S. Veerakumar, M. Keerthana
6. **Pezray Technologies (2020)** - Computer programming and IT consulting Founders: R. Immanual, Preethi Hariharan
7. **Dastute Switcher Technologies (2023)** - Complete software solutions with 11 integrated technologies Founders: Sanjay K.R, Dakshana J
8. **Shrimp Hoard Technologies (2017)** - Aquaculture and shrimp farming solutions Founders: Roger Rozario, Sushilkumar Paul Pandi
9. **9 To 5 Universe (2019)** - IT consultancy and electrical equipment manufacturing Founders: Nagarchunan P, Thendral D
6. **Vegha Vimana Pvt. Ltd. -** specializes in design and manufacturing and servicing of Drones,offering a comprehensive, one-stop solution for drone surveillance and product development Managing Director: Capt.Arvind Sareen,
